## Fire Risk Assessment

IOH H&S consultants have a high level of experience in fire risk assessments. Our experience has been gained in a variety of settings from assessing; major public events, offices, hotels and sheltered accommodation, leisure centres, construction and manufacturing sites to small self contained retail units.

We have successfully risk assessed various sites. All of our fire risk assessments have stood scrutiny and audit by the local fire brigade (your enforcing body). As with general risk assessments your fire risk assessment is the start point rather than the end point of fire safety within your premises. A piece of paper with 'fire risk assessment' written on it will not effectively communicate its contents to your workforce or assist with training fire wardens, establishing a good level of fire awareness amongst your staff etc. As well as developing the detailed documentation which goes with fire risk assessment IOH can also assist you in embedding these assessments, in developing Personal Emergency Evacuation Plans (PEEPs) for your staff with specialist needs, in training Fire Wardens, delivering fire awareness training to your staff, delivering Evac+Chair training for Fire Wardens or others. In addition to all of this we are able to assist you in developing your policy documents and fire plans or even auditing your existing Fire Risk Assessments to identify any gaps.

Our experience is also underpinned by a high level of training and IOH's Operations Manager is a Technician with the Institution of Fire Engineers (TFireE).

All of your fire documentation needs to be **easy to understand** so that you and your staff can respond quickly and effectively in the event of an emergency. Our experience in a variety of industries has given us the ability to communicate with staff at all levels within any business and to offer a solution to meet your specific needs which can be understood by all.

**IOH is here to help you with *Reasonable and practical health and safety* adding value and not cost to your business. If or where investment is required in your provision of physical facilities we will identify the best cost solution, and explain why we are advising you to undertake any alterations.**
